CLOUD & IT SECURITY

**SECUNET**

CLOUD & IT SECURITY

“

There are only two types of companies: those that have been hacked and those that will be.

Even that is merging into one category — companies that have been hacked and will be again.”

Robert Mueller  
Former FBI Director

Founded in the USA in 2017, **SECUNET** is dedicated to delivering unique, customized solutions in cybersecurity, AI development, and SaaS infrastructure.

Our team of international professionals shares a unified vision: providing tailored solutions that meet the specific needs of each and every client.

# Experience

Solutions

Cybersecurity

Cloud

AI Development

Our expertise spans three critical sectors: government, finance, and business. With extensive experience in both national and international projects, our specialists bring unmatched knowledge to every engagement. The results speak for themselves, establishing SECUNET as one of the premier cybersecurity solutions providers in the United States of America.

# Success Stories

**Client:** Sttaton Hermes SC  
**Solution:** Cybersecurity / Cloud  
**Country:** México

**Description:** Cybersecurity solution for Security Information Log Management (SIEM) and event management, three (3) cybersecurity engineers to support daily SOC operational tasks and special projects related to cybersecurity activities and SOC management - Security Operations Center.

**Client:** VIEW INC  
**Solution:** Cybersecurity  
**Country:** USA

**Description:** Installation, configuration and support of a cybersecurity platform (EDR) that allows comprehensive protection of Endpoints in any location they are located and advice on the evaluation of security events and recommendations for their mitigation (SIEM).

**Client:** Tier 4 Power Solutions  
**Solution:** Infrastructure / Cloud  
**Country:** Mexico

**Description:** Development and implementation of a digital contact center (CCD) for the service and sale of the company's industrial products, which integrated ERP, CRM, call center, and digital media (social networks, web page, and emails).

# Participation

**Client:** Bancolombia, Banistmo  
**Solution:** Cybersecurity  
**Country:** Colombia

**Description:**

Identification and investigation of complex threats (financial fraud). Tracking and monitoring of the internal information network. Design and development of SOC-NOC.

**Client:** PEMEX  
**Solution:** Cybersecurity/ consultancy  
**Country:** Mexico

**Description:**

Design of a comprehensive security model for data, voice and mobility analysis to collect and reconstruct all types of traffic from different networks in order to visualize, analyze, protect and investigate the information

**Client:** Policía Federal  
**Solution:** Cybersecurity  
**Country:** Mexico

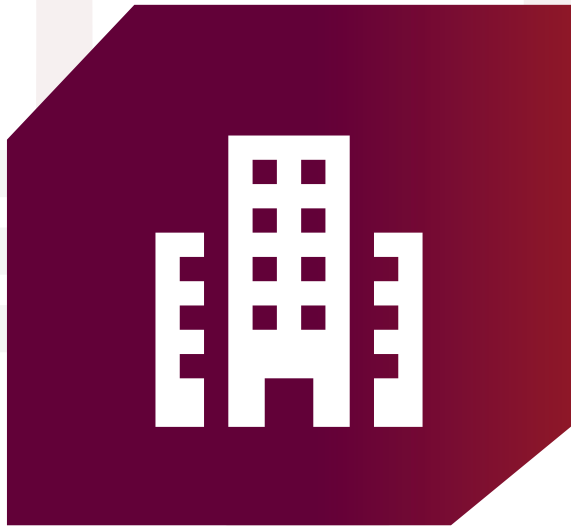

**Description:**

Development of a security system for the analysis of institutional data and voice. Integration of a cybersecurity scheme for the protection of critical assets through vulnerability testing and detection of potential threats in the internal system.

Protect Your Business with Unmatched Cybersecurity

## Stay Focused on Growth—We'll Handle the Security

### **Business**

- + Small and medium-sized enterprises
- + Health
- + Education
- + Financial services
- + Retail

### **Governments**

- + Local and regional governments
- + Federal Government

## Our Products

We have the most advanced products for real-time threat prevention, containment and reaction

- 🛡️ SIEM, SOAR, Threat Intelligence, XDR
- 🛡️ Anti-encryption protection
- 🛡️ Endpoint protection, mobile, laptop

## Our Services

Purple Room and Consulting Service.  
Assessing your security level and designing a strategy for implementing artificial intelligence.

- 🔗 Ethical hacking
- 🔗 Vulnerability analysis
- 🔗 Pentesting
- 🔗 Forensic auditing
- 🔗 Incident response
- 🔗 Malware analysis
- 🔗 SOC or NOC outsourcing
- 🔗 Consulting
- 🔗 Training

Protection

With our top cybersecurity specialists, we collaborate closely to develop a tailored strategy that maximizes your company's resources while seamlessly integrating our cutting-edge solutions. Our comprehensive, real-time security system provides full visibility into your data and communications infrastructure, ensuring unmatched protection and control.

- 
- Endpoint Protection
  - SOC or NOC Implementation
  - Threat Context and Intelligence
  - Training
  - Vulnerability Analysis

**VIRTUALIZATION SOLUTION**

Infraestructure

## Cloud Solutions

We design and implement world-class cloud infrastructure solutions, delivering software-defined data center services, software-defined infrastructure, and comprehensive backup and disaster recovery solutions. Trusted by organizations across the globe, from the USA to Mexico, the Philippines, Pakistan, Indonesia, Singapore, and Malaysia, our cloud solutions ensure seamless performance and resilience for your business.

### Main features:

- Optimal Cost-Effectiveness
- 24/7 Expert Support
- Integrated Monitoring and Management
- Seamless Scalability
- Flexible Public and Private Cloud Options
- Fully Customizable to Your Needs

Deploy your AI strategy or corporate data infrastructure within a public or private cloud

- Private cloud installation.
- Disaster recovery
- Pay only for processing and memory
- Compliance with international regulations and standards

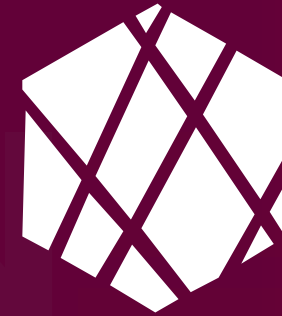

## REVOLUTIONIZING EDUCATION WITH HANDS-ON LEARNING

Our platform offers business-focused courses in technopreneurship, business management, entrepreneurial finance, and venture economics. These programs equip students with the practical knowledge and skills they need to excel in today's dynamic and evolving business environment.

- +/ Basic programming
- +/ Cloud computing
- +/ Cybersecurity
- +/ Software development

Innovative Learning Platform

# SOFTWARE DEVELOPMENT

SOFTWARE DEVELOPMENT

AI thrives on both structured and unstructured data.

At SECUNET Technology, we recognize that successful AI implementation in both companies and government entities involves three crucial stages. Therefore, assessing the security status of your infrastructure and information is more critical than ever:

Cybersecurity  
Reassessment

Vectorization of  
Information

LLM Application  
Development
